SURGERY FREE**

**...NEW 3D  
REFIRM  
TREATMENT**

## WHAT IS 3D REFIRM?

Designed for anyone experiencing skin laxity and loss of volume, 3D REFIRM treatments combine advanced, nonsurgical technologies of 3D Emlift and 3D Dermaforce to tighten skin, smooth texture, and reshape key areas for both the face and body.

Also ideal if you are experiencing skin laxity post GLP-1 weight loss injections, as it restores tone and definition- helping you feel confident in your post-weight loss body.

## WHY 3D REFIRM?

Remarkable results grounded in science and clinically proven. Supports natural enhancement without injectable volume. Stimulates collagen, tightens, contours and brightens skin. Tackles multiple problem areas of forehead, crows feet, mid-face, jaw line, neck, stomach, bingo wings & knees.

## 3D RE-FIRM™ PROTOCOLS AT A GLANCE

### Face – Lift, tighten and refine (texture + firmness)

**Technologies:** High-intensity electromagnetic muscle stimulation + Advanced Radio Frequency Microneedling.

### Body – Tighten skin, firm and contour with visible tone

**Technologies:** High-intensity electromagnetic muscle stimulation + Advanced Radio Frequency Microneedling

### Weight Loss – A gradual, targeted plan that can complement GLP-1, while focusing on skin tightening and cellulite

**Technologies:** High-intensity electromagnetic muscle stimulation + Cavitation + Cryolipolysis + Radiofrequency + Shockwave

**3D Dermaforce**  
ADVANCED RADIOFREQUENCY MICRONEEDLING

### HOW IT WORKS

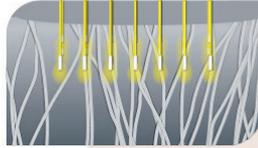

3D Dermaforce Microneedling/RF is an advanced method of skin rejuvenation.

The treatment stimulates the body's natural healing process to encourage collagen production in the dermis.

This results in rejuvenated and tightened skin.
